(54) EMERGENCY RESCUE SUPPORTING SYSTEM, PORTABLE TERMINAL WITH EMERGENCY RESCUE FUNCTION, WIRELESS TERMINAL FOR RECEIVING EMERGENCY RESCUE INFORMATION AND EMERGENCY RESCUE SUPPORTING METHOD

(57)Abstract:

PROBLEM TO BE SOLVED: To provide an emergency rescue supporting system for enabling an effective emergency rescue or the like.

SOLUTION: When the occurrence of an abnormality in the body of a user is detected from the measured value of a biological information sensor 2, a portable terminal 1 originates an emergency call to surrounding portable terminals 3. In each of portable terminals 3, a rescue request message is displayed and the user of the portable terminal 3 recognizes abnormality in the user of the portable terminal 1 and can immediately start dealing or the like. Besides, the portable terminal 1 can display a method of first aid or the like on its display screen or display screen of the portable terminal 3. Further, the portable terminal 1 reports an emergency call via a portable telephone network to a cell center server 7 and the call center server 7 displays a dealing method or the like on the portable terminal 1 and can perform emergency communication or the like as needed.

LEGAL STATUS

[Date of request for examination] 11.03.2003

[Date of sending the examiner's decision of rejection] 25.10.2005

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]
